1. Product overview

Tactical carabiners are compact attachment accessories for carrying keys, tools, flashlights, water bottles and other small items on belts, backpacks and MOLLE-compatible gear. Depending on the model, they come as a metal carabiner or snap hook only, or with one or more fabric straps, and can be single- or double-ended.

This manual applies to all tactical carabiner models, types, sizes and colours. The dimensions, weight, material, maximum load and design of your model are given on the product label and in the product datasheet. Some features described below may not be available on every model.

Features

- **Metal hook:** Spring-loaded gate for quick attachment and release.
- **Fabric strap:** Attaches the carabiner to belts, webbing and MOLLE gear.
- **Key ring:** Holds keys and other small items.
- **Double-ended design:** Two hooks for connecting two items or attachment points.
- **Compact design:** Lightweight for everyday carry and field use.

2. Usage, maintenance and care

Usage

- **Before first use:** Check that the gate opens, springs back and closes fully, and that the straps and fasteners are intact.
- **Attaching to gear:** Pass the strap around the belt or through the MOLLE webbing and fasten it fully.
- **Attaching items:** Open the gate, hook the item and check that the gate has closed completely.
- **Load:** Do not exceed the maximum load stated for your model. Do not load the gate or the side of the hook.
- **Safety:** Not intended for climbing, fall protection, rescue or lifting people. Do not use a carabiner with a deformed hook, a gate that does not close, or a worn strap.

Operating and storage conditions

Parameter	Value
Operating temperature	–20 to +60 °C
Storage temperature	–30 to +60 °C
Storage conditions	Store dry in a well-ventilated place
Sunlight	Avoid prolonged exposure to direct sunlight
Heat sources	Keep away from open flame and heat sources

Care instructions

Care step	Instruction
Cleaning	Wipe with a damp cloth or soft brush
Washing	Hand wash fabric parts only, max 30 °C
Detergent	Use a mild detergent
Bleaching	Do not bleach
Drying	Dry thoroughly; do not tumble dry
Lubrication	Apply light oil to the gate hinge if it sticks

- **Storage:** Store the carabiner clean and dry. Never store it wet, as this can cause corrosion of metal parts and mould on fabric.
- **Inspection:** Check the hook, gate spring and straps regularly; keep the gate free of sand and dirt. Do not use near open flame: synthetic fabric can melt.
